Description

Hi,

Checking the variable distmov_dv I came across that in many waves (not in the first ones) even though this variable has positive values, there's no information about when the person moved (mvyr|mvmnth). Is there any reason for this?

Thanks

History

- Status changed from New to Feedback

- % Done changed from 0 to 80

- Private changed from Yes to No

Hello,

That is because this variable is based on the postcode at the time of last and current interview.
Hope this answers your question. If not, please let us know.

Best wishes,
Understanding Society User Support Team
