#### caring [Caring for others outside the household]

**Universe:** Ask all.

**Source:** UKHLS covid-19 survey

**Text:** We would now like to ask you some questions about the help you give to and receive from family and friends, and how this might have changed since the coronavirus pandemic began.

Thinking about the last 4 weeks, did you **provide** help or support to family, friends or neighbours who do not live in the same house/flat as you?

1. Yes
2. No

**Help text:** Exclude any care given in the course of employment (e.g. by social worker or home help) but include if they provide care unpaid outside working hours. Exclude work in drop-in centres, luncheon clubs or meals on wheels. Include any service provided including visiting, sitting with them, keeping company, taking out, checking whether or not they are alright, helping with bills etc, as well as help with housework, cooking and personal care (e.g. washing or dressing). Include only one-to-one caring so that if, for instance, someone helps with meals-on-wheels or driving people to hospital this, in itself, does not count since they may be seeing different people each day. If, on the other hand they are paired off with one specific elderly/disabled person, this would count. Include here cases where person cared for is in the same building as respondent but lives separately (e.g. a 'granny flat' or annexe). Some respondents will be caring for people as a voluntary worker rather than as a friend or relative.
