Weights for use with wave 2 self-completion questionnaire & nurse assessment data

08/03/2018 09:39 AM - Rachel Bennett

Status:	Resolved	Start date:	08/03/2018
Priority:	Normal	% Done:	100%
Assignee:	Rachel Bennett		
Category:	Weights		
Description			
I am using data from the wave 2 mainstage interview and self-completion questionnaire together with the nurse assessment data for the US sample (not also the BHPS sample). There doesn't seem to be a specific weight for using the self-completion questionnaire respondents rather than everybody who has data from the mainstage interview. Could I clarify if 'b_indnsus_xw' is the correct weight to use in this instance?			
Many thanks			

History

#1 - 08/06/2018 10:44 AM - Stephanie Auty

- Category set to Weights
- Assignee set to Olena Kaminska
- Target version set to M2
- Private changed from Yes to No

Many thanks for your enquiry. The Understanding Society team is looking into it and we will get back to you as soon as we can.

Best wishes,
Stephanie Auty - Understanding Society User Support Officer

- Status changed from New to Feedback
- Assignee changed from Olena Kaminska to Rachel Bennett
- % Done changed from 0 to 70

Dear Rachel,

A reply from the Weighting team:
Yes, the weight you suggest is the best suboptimal weight so you should use that.

Best wishes,
Stephanie Auty - Understanding Society User Support Officer

Dear Stephanie

Many thanks for your help - I'll go ahead with those weights.

Kind regards
Rachel
