<b>Description</b> Hi, Can you let me know why the variable b_fihhmngrs_dv has negative values? has this variable been already equivalised with the mOECD scale? Also, is there a variable for net household income? I can't see it in the b_HHRESP. Thanks!

Jennifer,

Self-employed can report negative incomes. The income variables have not been equivalised. We only release gross household incomes. More information about the income variables can be found in the user guide.

Jakob
