<b>Description</b>			
Hi, I am currently using the disdif1-12 variables which are supposedly filtered through the health variable. However, there are some cases which report to have a functional impairment even though they said they do not have a long-term health problem/disability. Does that mean that there is a mistake in the way the disdif variables were filtered? Thanks! Regards, Lea			

### History

#### #1 - 02/13/2019 05:26 PM - Stephanie Auty

- Status changed from New to In Progress
- Assignee changed from Alita Nandi to Stephanie Auty
- % Done changed from 0 to 10
- Private changed from Yes to No

Many thanks for your enquiry. The Understanding Society team is looking into it and we will get back to you as soon as we can.

Best wishes,  
Stephanie Auty - Understanding Society User Support Officer

- % Done changed from 10 to 60

Dear Lea,

Are you looking at Wave 8 data? At Wave 8 the filter for this question was removed in order to capture people who may have one of the conditions listed but answer no to w\_health. The wording of w\_disdif is different for those who said no.

Best wishes,  
Stephanie
