Description

Hi,

I am working with the caregiving module and I would like to ask you if partner/spouse for the aidhu1 and aidhu2 are included in other relative or in friend or neighbour?

Thank you very much for your help.
Kind regards,
Camille

History

Dear Camille,

Those questions are asked of respondets who say yes to aidxhh, that they care for someone outside the household. To find out if they care for their partner/spouse, please use aidhua, person number of person cared for within the household, along with ppno, person number of their spouse/partner. To look for other caring relationships within the household you can use the egoalt file to check the relationship. We do not record specifically if they care for a spouse or partner living in another household.

Best wishes,
Stephanie Auty - Understanding Society User Support Officer
