Description Hello Stephanie, I want to construct hourly wages with w_paygu_dv which I assume include payments for overtime per month. For hours worked I got: w_jbhrs, w_jbot (overtime in normal week which is paid and unpaid I assume), and w_jbotpaid (which is paid overtime). If paygu_dv includes paid overtime, I guess the cleanest use would be adding up jbhrs and jbot? Does jbot include the self-employed? A short reply would be terrific. Thanks. Nico

Dear Nico,

w_paygu_dv includes overtime if the individual usually receives overtime pay.

You can find out whether w_jbot includes the self-employed by looking at the Universe, in either the online documentation or the questionnaires.
https://www.understandingsociety.ac.uk/documentation/mainstage/dataset-documentation/wave/8/datafile/h_indresp/variable/h_jbot

Best wishes,
Stephanie

Thanks a lot Stephanie.

Have a great weekend.

Nico
