Description			
Hi,			
We have granted access to the gwas data through EGA (through WTSI) after the process of signing an agreement (dataset EGAD00010000890). However, the data-set we granted access to contains illumina's IDATS files with the signal intensities making it time-consuming to process them. Is there anyway we can get this data in plink format?			
Thanks a lot, Dionysios Grigoriadis Bioinformatician St. George's University of London			

History

- Status changed from In Progress to Feedback
- Assignee changed from Stephanie Auty to Dionysios Grigoriadis
- % Done changed from 10 to 90

Dear Dionysios,

We do not support these files here. Please write to the EGA about this.

Best wishes,
Stephanie
