Description I want to use jbsoc10 and jbsic07 on the indresp file from wave 3-wave 9 for some analysis that i'm doing. However, the data sets that I have downloaded from the UKDA do not have these variables despite the Understanding Society website saying that these variables appear on every wave. There is only the 3 digit condensed version of these variables available (jbsoc10_cc and jbsic07_cc). Please can you help with how I can obtain the 4 digit versions on the understanding society indresp datasets?			

History

- Status changed from New to Feedback
- % Done changed from 0 to 70
- Private changed from Yes to No

Dear Chloe,

The blue banner at the top of the pages in the online documentation for the full (non-condensed) versions of these variables indicate that they are only available in the Special Licence datasets. You can read about the application process for Special Licence here: <https://www.understandingsociety.ac.uk/documentation/access-data>

Best wishes,
Stephanie
