<b>Description</b>			
Hi,			
I'm looking at the private pension flag in wave 1. The variable's name is call "a_privpen". There are two code "0" and "1" in it. I search the questionnaire book but can not get the meaning of them. Could you check it for me?			
Frank

If you look at the "Use" of the variable in the questionnaire, you will see that it is computed on the fly in the Blaise scripts. Directly asked questions are usually a better starting point for substantive information. The computed flag variables are sometimes useful if you would like to understand how the CAPI process works.

Jakob
