<b>Description</b> Hi, I hope this finds you well. We've been doing some policy work which requires use of the derived variable jbiindb_dv. We understand that these classifications are based on a condensed 2-digit versions of SIC2007 codes, and were hoping you would be able to provide us with the correspondence between the SIC codes and the categories used in jbiindb_dv. We haven't been able to find anything on your website, so have attempted doing this ourselves, but we would be grateful for your guidance. Please let me know if you have any questions. Regards, Lisa Panigrahi

Hi Lisa,  
as is indicated in the variable description, this variable is from the Cross-National Equivalent File (CNEF). You can find the variable documentation on the designated CNEF page, <https://cnef.ehe.osu.edu/data/codebooks/>  
Best wishes,  
Gundi
