<b>Description</b>			
Hi Jacob,			
I want to investigate whether differences in results at different time points from some selected BHPS variables from 2001 to Wave 2 Understanding Society are significant. Will running the weight b_indscbh_xw on Wave 2 be enough to allow this comparison or would this require some complicated modelling.			
Thanks			
Theo

Theo,  
It is not so easy to give a quick answer to this as it would depend on the study question and the study design, which falls outside this user support's remit.

Jakob
