Description Dear Sir/Madam, I hope this finds you well. I am currently looking at the Scottish referendum variables at Waves 5 and 6. The value label for f_scotvot2 (how expects to vote in Scottish referendum) seems to rather correspond to the value labels for f_scotvot1 and f_scotvot3 (plan to vote/voted). Shall I assume that the values are correct and correspond to the label for e_scotvot2? It might be a minor question, but wanted to check with you to be on the safe side. Best wishes, Ivelina

Hi Ivelina,

Thanks for highlighting this. I have asked the data team to find out if there is any reason to believe that respondents were presented with the wrong response options. Given that the response options were correct in the questionnaire, I don't think that was the case and this is a matter of simple mis-labelling.

Best wishes,
Alita

Hi Alita,

Thank you for your prompt reply and for clarifying.

Best wishes,

Ivelina
