Using weights for all 9 waves

09/23/2020 11:07 AM - John Poole

Description <p>I'm using all 9 waves of data and need to choose the correct weight. I understand that using 'indscui_lw' appears to be the correct choice, considering that I need longitudinal weights, I'm using the self-completion data and I'm using data up to wave 9. However, I'm still unsure on a few things:</p> <ol style="list-style-type: none">1. For individuals who are present in all 9 waves, do I then need to copy the weight from wave 9 into every other wave for each individual?2. Suppose an individual is present in waves 1-8 but not in wave 9, do I then use the value of indscui_lw from wave 8 and then copy this to waves 1-7 for each individual?3. Values of indscui_lw are only available in waves 7-9. Suppose I have an individual who is only present in the data from waves 1-6. As I do not have an indscui_lw value for them, do I then take the weight from the equivalent measure, indscub_lw, which is available from waves 3-9? In this case, should I then use indscub_lw for everyone? <p>Thanks in advance.</p>

Hello,

If you are analysing data from adult questionnaire including self-completion questionnaire from Waves 1 to Wave w (2...9), then you should use the weight w_indscus_lw. You should copy this weight from that wave w onto all earlier waves.

If you are analysing data from adult questionnaire including self-completion questionnaire from Waves 2 to Wave w (3...9), then you should use the weight w_indscub_lw. You should copy this weight from that wave w onto all earlier waves.

If you are analysing data from adult questionnaire including self-completion questionnaire from Waves 6 to Wave w (7...9), then you should use the weight w_indscui_lw. You should copy this weight from that wave w onto all earlier waves.

Here is more information on selecting the correct weight.

<https://www.understandingsociety.ac.uk/documentation/mainstage/user-guides/main-survey-user-guide/selecting-the-correct-weight-for-your-analysis>

Hope this helps. If you have further questions let us know.

Best wishes,
Understanding Society User Support Team
