Description			
Hi, Please could you point me in the right direction to find the 'detailed variable view' referred to in documentation, so that I can access descriptions of derived variables. Kind regards, David			

History

#1 - 05/16/2013 03:17 PM - Redmine Admin

- Category set to Data documentation
- Assignee set to Redmine Admin
- Target version set to X M
- % Done changed from 0 to 20

Derived variables have got the suffix, `_dv`, see e.g.

https://www.understandingsociety.ac.uk/documentation/mainstage/dataset-documentation/wave/2/datafile/b_indresp/variable/b_jbnssec_dv

For the time being you might have to use `*` as wild card, e.g. `* bmi *` rather than `bmi`

Let us know if this did not answer your questions.

Jakob

Ok, I had seen these individual variable pages but I thought there may be more detail somewhere. Thanks.

#3 - 05/17/2013 08:24 AM - Redmine Admin

Let us know if you need some further information on some specific derived variables.
