| Sorry couldnt reply to the previous query so this follows on from issue #161 . Where do I find the data for the variables in the above module? They're listed as being in the b_indresp datafile but they're not in the file I have recently downloaded. I'm not after the documentation for them I need the data to analyse them Thanks Clare | | | |

- Category changed from Data analysis to Questionnaire content
- % Done changed from 0 to 10

Could it happen that you have downloaded the Innovation Panel data rather than the data from the mainstage panel?
Jakob
