Description Despite having insured it is the main sample (no the innovation panel) and having downloaded it multiple times (in SPSS format) I seem unable to download any data with a size bigger than 2568 individuals despite being under the impression data was available for 40,000 households. Is there some download restriction I am unaware of. I have uncompressed the file yet this still does not increase sample size. Anyone have any ideas?			

History

- Status changed from New to In Progress
- Target version set to X M
- % Done changed from 0 to 50

the sample sizes to expect can be gleaned from the tables here:

<https://www.understandingsociety.ac.uk/documentation/mainstage/dataset-documentation>

The main response files are INDRESP, HHRESP and YOUTH.

I believe I may have identified the problem, the link that claims I am downloading wave 1 and 2 on the UK data service website seems to download the innovation panel instead. It may be a broken link?

The UKDS helpdesk should be able to help you.
