Description			
Hi there,			
I want to study the sample out of work with a long-term disability. To measure this variable, is there an indicator for a reason out of work? Or do I need to combine unemployment with long-term illness by myself?			
I saw employmentstatushistory_w5.leshst has this specific reason, but only wave 1 and wave 5 have this question. Also, this is in the empstat data, to use this indicator, do I need to merge it with the indresp dataset?			
Thanks for the help!			
Best, Huihui			

History

- Private changed from Yes to No

#3 - 07/21/2022 06:39 PM - Understanding Society User Support Team

- Category set to Questionnaire content

- % Done changed from 0 to 80

Hi Huihui,

Would jbstat be helpful? Category 8 "LT sick or disabled" gives you this information and is available in all waves.

Best wishes,
Understanding Society User Support Team
