Description Hi, Hoping to get some clarity on one of the UKHLS variables and get an idea what it adds. We will be using UKHLS data to look at fuel poverty and mental health. Looking to use household income as one of the variables and I have noticed there are household income variables that require special licence (variable names below). These seem to be adjusted for benefits? Wasn't sure how much more these add and whether we should apply for the special licence just for access of these. fihhmnnnet3_dv fihhmnnnet4_dv

- % Done changed from 0 to 50

Hello,

Please take a look at the section of our user guide that details the income variables that we provided and what each constitutes.

Hope this helps. If you have further questions please let us know.

Best wishes,
Alita
