Description Hi, I'm trying to find some variables on job satisfaction and promotion in wave 2 of the Understanding Society dataset. Specifically I'm looking for variables that relate to satisfaction with particular aspects of the job (total pay, job security etc) - previously called jbsat2 in the BHPS I think. I am also looking for information about promotion opportunities (jbopps) and whether someone was promoted in the last 12 months. I've searched through the documentation and, from what I can gather, these variables are not included in Understanding Society. I just wanted to confirm this is the case, Many thanks for your help, Sarah			

History

- Category set to Data documentation
- % Done changed from 0 to 50

Promotion is a response category for reasons an employment spell has ended. This information is collected through the annual events history module with the items, w_stendreas and w_jbendreas.
