Description Dear User Support Team, I was wondering why there were so many cases inapplicable in terms of occupational class (current job) for example in the I_indresp file. Any guidance and suggestions would be greatly appreciated. Best wishes, Sijia Du sijia.du@manchester.ac.uk sijia.du@nankai.edu.cn

Hello,

This variable value for jbsoc00_cc is missing for anyone who does not have a job. Please check the questionnaire and in that look at the Universe below the current job occupation question - you will see it describes who gets asked the question: "JBHAS = 1 OR JBOFF = 1// has a job"

Those who don't have a current job are asked if they ever had a job and information about their last job is collected - jlsoc00_cc

Hope this helps.

Alita
