Description			
Hello,			
I'm looking at waves g to l. There are several instances where there are some individuals who are in the indresp file and have a household identifier hidp, but this hidp does not appear in that wave's hresp file? Is there any reason for this?			
Thanks, Imogen

Dear Imogen,

Households who complete the household questionnaire are in the hresp datafile. There are some cases where the household is enumerated (so all the household members are in indall and those who complete adult interviews are in indresp), but they don't complete the household questionnaire so the household is not in the hresp datafile.

Hope this helps.

Best wishes,
Alita
