Description			
Dear colleagues,			
I have observed that the derived variable "Born in UK" reports a substantial number (8.61% of observations, if I'm not wrong) of 'missing values'. The other two values are obviously 'born in UK' and 'not born in UK'. Is there any specific reason / pattern explaining these missing values.			
Many thanks for your attention			
And best wishes			
Luis Ortiz Gervasi

- Status changed from New to In Progress
- % Done changed from 0 to 30
- Private changed from Yes to No

Hi Luis,

Before I can investigate this further, could you please provide a few more details: the name of the variable(s), which datafile and which wave.

Many thanks,
Understanding Society User Support
