

Understanding Society User Support - Support #1945

Using the individual questionnaire

08/01/2023 01:11 PM - Joshua Parry

Status: Resolved	Start date: 08/01/2023
Priority: Normal	% Done: 100%
Assignee:	
Category: Survey design	
Description When doing analysis at the individual level. Is it valid to do research using multiple members of the same household or would you just one person within each household.. For instance, if i was trying to assess the prevalence of volunteering in individuals. Would you use one individual response per household or the response of all individuals from each household?	

History

#1 - 08/03/2023 09:56 AM - Understanding Society User Support Team

- Category set to Survey design
- Status changed from New to Feedback
- % Done changed from 0 to 80
- Private changed from Yes to No

Hi Joshua,

You should use all individuals in the household.

Best wishes,
UKHLS User Support
