Description			
Hi,			
from the variable catalogue I can see that "urban_dv" is derived from the ONS Rural and Urban Classification of Output Areas 2001. Does this mean the UKHLS still assesses recent individual's Rural/Urban status by their closeness to urban settlements of 10,000 or more IN 2001 or has this been / is this going to be updated?			
I think it is reasonable to assume that some areas may have experienced quite significant population loss gain over the last 20 years.			
Many thanks, Caroline			

History

- % Done changed from 0 to 80

Dear Caroline,

We will consider updating the urban_dv variable using the newer 2011 classification. In the meantime, you can apply for the Special Licence copy of the census 2011 urban rural dataset which contains the full classification: <https://beta.ukdataservice.ac.uk/datacatalogue/studies/study?id=7630>

Best wishes,
Piotr Marzec,
UKHLS User Support
