Description			
I'm wondering is there a socio-economic status indicator for those aged 16/17? As highest educational attainment/ job status is not an applicable SES indicator for adolescents. I see there is the variable masoc90 and pasoc90, but is there a variable for parent's highest educational attainment or another SES indicator? Thanks

Hi,

For non-resident parents you can use `paedqf` and `maedqf`, or `panssec8_dv` and `manssec8_dv`, for resident parents you can use any of the available measures for parents (e.g. `hiqua1_dv` or `jb/jlnssec_dv` `jb/jjlnssec8/5/3_dv`). To link co-resident parents to children you can use the syntax available here: <https://www.understandingsociety.ac.uk/sites/default/files/downloads/documentation/mainstage/syntax/stata/stata-parents-children-matching.do>

Hope it helps.

Best wishes,
Piotr Marzec,
