Understanding Society User Support - Support #2188

mortus_tw from wave i onwards

01/04/2025 05:40 PM - Gareth Hagger-Johnson

Status:	Feedback		**Start date:**	01/04/2025

Description

I am constructing a tailored weight and need to remove mortality and movement out of sample, from waves b to m.
In xwavedat there is b_mortus_tw to h_mortus_tw, but not i_mortus_tw onwards.
Are these unavailable at this time?

Thank you in advance,

Gareth

Gareth,

Yes, correct. You should still remove the interviewer identified death, which can be found in outcome (ivfho and ivfio, outcome, finloc) variables.

Hope this helps,
Olena
