Description Hi, I've merged together BHPS indresp Waves 1 - 18 and USoc indresp 2-3 to construct consistent work-life histories. However, in order to identify whether respondents' work status' changed between waves I did want to also merge jobhist data. I cannot find the jobhist data for the BHPS sample within the USoc data. Is this available?

The BHPS work-life history files were released as added-value datasets. We expect that similar work will emerge from research projects once more waves of UKHLS have been amassed.
