Description Hi all, I hope you all are well. I will be using the harmonised BHPS data from 1991 to 2015 for a long panel study. I am aware of the section on weight selection in the user manual and the very helpful visual guide on YouTube. I plan on using matching with regression adjustment as part of my analysis and wonder how to combine probability weights due to design based stratified sampling and analytical weights that would arise from any matching algorithm I propose to use. Best wishes David			

History

#1 - 11/10/2025 09:54 AM - Understanding Society User Support Team

- Category set to Weights
- Status changed from New to In Progress
- Assignee changed from Understanding Society User Support Team to Olena Kaminska
- % Done changed from 0 to 10
- Private changed from Yes to No

Many thanks for your enquiry. The Understanding Society team is looking into it and we will get back to you as soon as we can. We aim to respond to simple queries within 48 hours and more complex issues within 7 working days.

Best wishes,
Understanding Society User Support Team
