Assignee:	Ourega-Zoe Ejebu		
Category:	Weights		
Description			
I am using BHPS but I did not apply weight on my sample (I aksed my supervisor and he told me it is not that important to use weight of the dataset seems representative enough)? Does that matter that I did not use weight?

The what-when-why of weights are covered in the user guide, see also this FAQ;
https://www.understandingsociety.ac.uk/support/projects/support/wiki/Which_weights_should_I_use

Let us know if you have any additonal questions.
