<b>Description</b>			
Hi,  I am having trouble locating the hrepid variable in the hhresp data file in the latest release of the data. The online documentation states that it should be there, I haven't checked all the waves but it seems to be missing from at least the first three waves. Has something changed with this variable?  Thank you very much for your help.

- *Private changed from Yes to No*

Hello Monica,

I can confirm that the variable hrepid was removed from the different files because it was incorrectly coded. Our Data Team is already aware of the issue and will implement the necessary corrections.

In the meantime, I am attaching a Stata syntax file that can be used to derive hrepid correctly. Please note that this syntax uses variables birthm (month of birth) and dobm\_dv (month of birth derived), which are only available under Special Licence SN 6931 (<https://datacatalogue.ukdataservice.ac.uk/studies/study/6931>)

I hope this information is helpful.

Best wishes,  
Roberto Cavazos

Thank you very much Roberto, that's very helpful.

Kind regards,

Monica

Hi Roberto,

Is the variable hrpno included in the hhresp datafile correctly coded or does the problem also affect this variable?

Thank you very much for your help,

Monica
