Description			
Hello,			
<p>I am seeking a possibility to see patterns of religious conversion in USoc, namely which respondents have indicated current religion (opr1) that were different from their upbringing religion (opr0). However, I see that in all three waves, opr0 was asked only if a respondent answered he/she had no current religion (opr=2). It thus only reveals the upbringing religious background for non-religious respondents.</p> <p>I would like to know if it is possible to see the data of upbringing religion for those who were religious and indicated a current religion. I would also like to know if such information is asked and available in past BHPS respondents who were also brought into USoc. There is a variable wOPRLG6 in BHPS wave 13 and 15, but with very limited valid cases that were only applicable to new N.I. respondents.</p> <p>Thank you very much.</p> <p>Yinxuan</p>

Your interpretation of the metadata for OPRLG0 is correct

https://www.understandingsociety.ac.uk/documentation/mainstage/dataset-documentation/wave/1/questionnaire-module/religion_w1#religion_w1.oprlg0

and also for wOPRLG6

<https://www.iser.essex.ac.uk/bhps/documentation/volb/wave15/oindresp2.html#OOPRLG6>

So about losing a religion. We will pass your on query on to the questionnaire team for when they next review the content.
