c_fyirinvinc_dv vs c_fyrdia

02/03/2014 05:40 PM - Onyinye Ezeyi

Status:	Closed	Start date:	02/03/2014
Priority:	High	% Done:	100%
Assignee:	Onyinye Ezeyi		
Category:	Income		
Description Hello, Could you please tell me the difference between c_fyirinvinc_dv and c_fyrdia and how c_fyirinvinc_dv is calculated. In particular, it would be good to know why c_fyirinvinc_dv has 5000 more observations than c_fyrdia, given that they are both in the individuals dataset. Thanks in advance, Onyinye			

History

#1 - 10/22/2015 09:25 AM - Redmine Admin

- Category changed from Data inconsistency to Income
- Assignee changed from Redmine Admin to Onyinye Ezeyi
- Target version set to X M
- % Done changed from 0 to 50

Some are questions and the details can be found in the questionnaire specification and others are derived variables, which we are currently preparing further documentation for in the form of the user guide for the forthcoming data release. Variables based on income imputation will be complete for more cases than underlying income questions themselves.
On behalf of the team, Jakob
