**Description**

Hello,

I want to compare respondents to the Nurse Health Assessment in Wave 2 to all those who were eligible to participate.

I have not been able to find a variable or flag which shows who was eligible, does something like this exist?

I have been able to compare those who are eligible by removing non GB residents, non-English interviews etc., however in the second year of Wave 2, eligibility was further restricted to .81 of the primary sampling units (PSU's) in England - and I do not know how to identify who this could have made eligible or ineligible. Can you tell me if there is a way to do this?

Thanks!
Caroline

*- Category set to 24*

*- Status changed from New to In Progress*

*- Target version set to X Ns*

*- % Done changed from 0 to 50*

Please take a look at the variable, w_elig, on W_INDSAMP_IP, which summarises eligibility and outcomes of all issued and assessed in the health assessment.
Jakob
