Description			
Hello,			
I'm very interested in the Waves 2-3 Biomarkers dataset containing information derived from blood samples, including cortisol, epinephrine, norepinephrine, c-reactive protein, fibrinogen, cholesterol, and HbA1c levels. I'm aware that this dataset is not publicly available yet, could you please tell me the tentative release date for these variables? If they have already been released or will be released momentarily, can I simply download the dataset or would it be placed as a Special Licence file?			
Thanks very much, Claryn

- Category set to Data releases
- Target version set to X Ns
- % Done changed from 0 to 50

we will update this faq when we have got a date for the release. The samples are still being analysed at the moment.
