Description I am trying to find out the size of your sample in the older age ranges (65 +, 85 +) and your ethnic group sample sizes within these age ranges. Is it possible to be provided this information? Many thanks, Emily	

History

#1 - 09/11/2014 02:00 PM - Redmine Admin

- Category set to Ethnicity
- Target version set to X M
- % Done changed from 0 to 50

We have so far interviewed more than 15,000 adults with an ethnic minority background. About 1,600 of those were born before 1948 and a few hundred before 1928.

follow-up question from [#303](#)

Respondents with a South Asian background accounted for approx. 37% of all those with minority background. For the cohorts born before 1948 and 1928, respectively, this percentage was 26-28%. The equivalent percentages for African-Caribbean respondents were 9, 15 and 11%, respectively.
