<b>Description</b>			
I have a quick query about the interim wave 2 youth data. The variable b_yppsrt is not coded with the same response categories as are present in the questionnaire document - a frequency on the variable reveals all possible numerical options from the questionnaire are available. Can I just check that the categories are as in the questionnaire document not in the value label section of the data file.?			
Many thanks Kareena

- % Done changed from 0 to 50

Hi Kareena,

Apologies, there is an error in the value label. 6 should be "never" and 5 should be "less often than once a week".

Thanks.
