<b>Description</b>			
<p>Hi, I am Maria, a PhD student in Sociology at University of Essex. I have some questions about documentations and data available. I was wondering in which datafiles I can find the variables showed in the modules for wave3. In my case, for example, where can I find the grid.variable Emboost that appears in the list of the grid variables in the Modules section on the website in the datafiles? I need them because the route of many variables referred to them and I would like to see their tabulation. Many thanks, best Maria</p>

emboost indicates the households screened in at Wave 1 to form the 2009-2010 ethnic minority boost sample. The different samples can be identified with the sample origin variable, hhorig, released all waves on core data files; see e.g.; <https://www.understandingsociety.ac.uk/documentation/mainstage/dataset-documentation/wave/xwave/datafile/xwavedat/variable/hhorig>
