<b>Description</b>			
Please can you tell me where I can find the variables jnmnth and jnyear in wave 4? The corresponding variables in waves 2 and 3 were called joinmnth and joinyear and are in the data files b_indall and c_indall respectively.

The way data on household joiners were asked changed slightly between W3 and 4 and the variable names were changed. Unfortunately the relevant variables for this did not get released for W4. We will correct this in the next revision of the Wave. Thankyou for making us aware of this issue.
