<b>Description</b>			
I'm trying to do some work on council tax and I'm quite surprised at the high level of non-response to the council tax band question over the four waves. Is there any easy explanation for this?			
Regards and thanks in advance for your help David

- Target version set to X M
- % Done changed from 0 to 50

from Wave 2 onwards the question (assuming you refer to hsctax?) is routed on whether the household questionnaire respondent is at a new address. It also excludes a small number of households not interviewed face-to-face.
