Description

I have a general question: does anybody know how many twin pairs (roughly) were identified based on the twins_w4 module questions asked to mothers of siblings with the same birthdate?

History

#1 - 06/02/2015 04:33 PM - Redmine Admin

- Status changed from New to In Progress

- Target version set to M4

- % Done changed from 0 to 50

There were about 170 pairs.
On behalf of the team,
Jakob
