<p>Description</p> <p>Hi, there</p> <p>I was trying to obtain the housing quality indicators/variables from the BHPS data, and applied to the data service having obtained the conditional access.</p> <p>However, I realised I was supplied with the 9 character coding instead of the 4 digit coding, and it seems the data service only supplies this type of coding in SN6027. I would very much prefer to have the old LAD code at hand if that's possible.</p> <p>So to make things a bit clearer, for example, the code I was supplied with Leeds is "E08000035", but I want to have this older coding version "00DA".</p> <p>Many thanks for your help,</p> <p>Best,</p> <p>Cathy</p>			

History

#1 - 06/02/2015 04:37 PM - Redmine Admin

- Category set to Data linkage and consents
- Status changed from New to In Progress
- Target version set to BHPS
- % Done changed from 0 to 50

The source of the LAD code can be found in the documentation. Lookup tables to older geographies can be created from publicly available data from ONS.

On behalf of the team,

Jakob
