Understanding Society User Support - Support #413

discovering whether a variable is asked in Round 5 (etc.)

Description

Hi -- I would be grateful for a bit of help in determining whether the variable EthID3 is asked of all relevant respondents in Wave 5 (relevant = EMBoost, GP Comparison, LDA, etc.). I can see that the question is in the Wave 5 questionnaire, but I want to make sure that it isn't asked only of new sample entrants. I've tried working this out via the Long Term Content Plan, but it isn't clear to me which "theme" it falls under -- it could be "Identity" (thus part of the Ethnic Identity module) but that theme is indicated on p. 6 as being asked in Waves 2 and 8.

My goal is to compare respondents' answers in Wave 2 and Wave 5; if it is asked in Wave 5 only of new entrants, I won't be able to do that.

thank you,
David

History

#1 - 09/10/2015 10:19 AM - Alita Nandi

These questions were asked only of 16-19year olds in the extra 5 minute sample OR a recent immigrant. But they should have completed an adult or youth interview in an earlier wave and the interview mode in wave 5 should be face-to-face.

If you check the "Universe" below a question in the questionnaire you will see who gets asked the question (the routing/filtering rule).

Best wishes,
On behalf of the team
