Job History Data

Description I've looked at both the BHPS and UKHLS data. Am I correct in saying that BHPS has job history data whilst the UKHLS does not? I wanted to extract the 'years of part time work experience' and the 'years of full time work experience' and use them as variables. Is this not possible with the UKHLS data? Thank you!

Employment histories were collected for the 1-6 month samples in wave 1 and for the remaining 6-24 month samples in wave 5.
Best wishes,
On behalf of the team.

Hi Alita, thanks for your reply that answers my query.

I had another question. I wanted to ask if you knew how to use these employment histories to sum up an individuals part-time and full-time employment experience? I wanted to make variables which give a person's part-time and full-time work experience which could be used in a wage equation.

Thanks

Hi Anuj,
You will have to create these variables yourself. We do not provide these derived variables as yet.
Best wishes,
On behalf of the team.

Hi Alita,

Thank you for your reply.

I wanted to ask why the employment histories for the 1-6 month samples were in wave 1 and the 7-24 month samples were in wave 5. Is there a specific reason for this? I wanted to ask because of sample selection issues.

Thanks

#7 - 12/21/2015 07:41 AM - Alita Nandi

As the reasons for this decision was not dependant on any individual, household or regional characteristics and as the monthly samples are random samples, there should not be any selection bias. However, depending on how you use the data, you will have to consider differential non-response (wave 1 vs wave 5).

Best wishes,

On behalf of the team.

Hi Alita,

Thanks for your reply, that was very helpful.

I wanted to ask if the UKHLS dataset provided a variable for which region the individual lives in. So, whether they are living in London, or Scotland, or the South-East?

Thanks,

Anuj

Yes, it is called w_gor_dv (w is the wave prefix)

Ahh ok thank you very much. Also, I was struggling to find an indicator for a person being in a trade union? I remember the BHPS did have this, so I was assuming the UKHLS must have this too.

Thanks,

Anuj

The best way to find out is to either search in the questionnaire for the wave you are interested in

<https://www.understandingsociety.ac.uk/documentation/mainstage/questionnaires>

or use our online search facility

<https://www.understandingsociety.ac.uk/documentation/mainstage/dataset-documentation>

Hope this helps.
