Description My enquiry is about IMD/Carstairs scores. As I understand they are not included in the data but should be linked to geographical identifiers (such as OA) accessible with the special license? There has been a question about this (Support #99) but the link on it has expired. Thank you			

History

#1 - 12/15/2015 08:59 AM - Redmine Admin

- Category set to Data linkage and consents
- Target version set to X M
- % Done changed from 0 to 50

Thanks for letting us know. The new link is:

https://www.understandingsociety.ac.uk/support/projects/support/wiki/Is_it_possible_to_merge_in_data_on_geographical_identifiers_eg_Census_information

(.org is now .ac)

The most fine-scale unit we release under Special Licence is LSOA.
