Description Hi there, I see from the documentation that the variable e_sexuor is available in wave 5 of the panel. However, it seems that only a subsample of the population answered this (young adults?). Could you please confirm if this variable was administered to the whole population or not? Thanks in advance. Kind Regards, PP

Dear Paco,

Yes, this question was only asked of 16-21 year olds in wave 5. Other adult respondents were not asked this question. This was part of the young adult self-completion questionnaire (see Table 24 of the User Guide and the Universe for this question in the questionnaire).

Hope this helps,

Best wishes, Victoria
