Description I was trying to look at who changed jobs using waves 2, 3, and 4 of Understanding Society. For this I looked at whether the respondent was still in the same job, with the same employer, and at the same workplace. These are three different variables in the questionnaire. Only on one of these three variables, namely whether the respondent is still with the same employer, some respondents are coded -9 (missing). According to the user manual this means the answer is "missing by error or implausible". Is it known why this occurred? Thanks in advance for your reply.

Dear Mariska,

Many thanks for your enquiry, and apologies for the delay in responding.

We are actively looking into this issue at the moment and will get back to you with an answer as soon as we can.

Best wishes, Victoria.

On behalf of the Understanding Society User Support Team

#2 - 02/05/2016 03:00 PM - Alita Nandi

Dear Mariska,

There was a scripting error for this routing flag. These cases were assigned a value of -9. This issue was resolved by wave 5.

Best wishes,
Alita
