Category:	Data documentation		
Description Hello: I see that for certain questions, in the online documentation, it says "SPONTANEOUS" (for example, variable a_pafar) for some response values in a given question. Can you clarify what this means? Does this mean this response category was NOT asked to respondents and rather, they "spontaneously" volunteered the answer? Thank you!

Sung,
Yes, SPONTANEOUS is a valid response code, that isn't prompted or printed on showcards, etc.
Jakob
