Description

I have observed that the data includes the condensed 3-digit version of the Standard Occupational Classification (SOC) i.e. the variables jbsoc00_cc and jbsoc90_cc but not the 4-digit version of it (jbsoc00 and jbsoc90).
Is it possible to access the data for the variables jbsoc00 and jbsoc90?

Hi David,
for confidentiality resasons we cannot release all information in the Standard End-user Licence - so technically, the variables are rightly not included in your version of the data.
The User Guide, specifically Chapter 4 "Data Access", provides information on which data files are released and which version to apply for if you want to use, e.g., the full socio-economic classifications. It also provides references to fuerther information about how to apply.

On behalt of the Understanding Society User Support team,
Gundi
