Description			
Hello,			
I need to know if the the individual interview outcome with code 9 (Lost CAPI intvw) is a complete interview or not, in order to clasify these cases as respondents or not respondents. I know that the informacion from the interviews is not available but I am not sure if these people answered before the CAPI lost. Would you help me, please?			
Thank you very much!

E\_IVFIO=9 cases

Our data team has investigated and this is their response: Our understanding is that “CAPI LOST” means an interviewer administered interview which has been lost on the interviewer’s laptop. But whether this interview is full or partial is impossible to know. The data from the fieldwork agency has these individuals with a fieldwork outcome of 11, which indicates a full interview, and not a proxy, but since we have no actual interview data we cannot be absolutely sure.

Best wishes,  
Alita
